Eastern Oak College of Nursing Sciences (EOCNS)

Professional Portfolio Case Study

Problem, solution, and outcomes for portfolio use

Prepared by Fortunatus Alolote Fayeofori

Version dated 13 November 2026

Live site: https://travis-global.github.io/qa_attendance/

1. Problem

The college needed a single, affordable system to track lecture delivery, hostel biometric attendance against boarding fees, student master data, and official QA reporting — without relying on scattered spreadsheets alone.

2. Solution

A browser-based SPA with offline-capable IndexedDB storage and GitHub-backed publish for multi-device institutional truth, officer PIN gating, audit, and professional PDF/Word/CSV outputs.

3. Notable features delivered

- Filtered student register reports and DSA full dossiers
- Daily/weekly/monthly QA lecture packs with officer name on each release
- Hostel train/link, location-aware gate compute, editable preview before fee download
- Remedial subsystem
- Safe publish with confirmations against accidental bulk erase
- Handover documentation package for non-technical officers

4. Outcome

Officers can operate daily work from the live site, keep devices aligned through Publish, and produce auditable reports. Documentation guides lay users through each menu path.
