EASTERN OAK COLLEGE OF NURSING SCIENCES

Quality Assurance Department

OFFICIAL SYSTEM HANDOVER DOCUMENT

Transfer of the EOCNS Attendance & QA System to the College

System	EOCNS Attendance & Quality Assurance System
Live site	https://travis-global.github.io/qa_attendance/
Repository	https://github.com/travis-global/qa_attendance
Developer	Fortunatus Alolote Fayeofori
Document date	30 October 2026

1. Purpose of handover

This document records the formal handover of the EOCNS Attendance & Quality Assurance System from the developer, Fortunatus Alolote Fayeofori, to Eastern Oak College of Nursing Sciences. The system was developed voluntarily during a one-year service placement to strengthen academic quality assurance, attendance management, remedial class tracking, and related administrative workflows.

2. System purpose

The system provides a single offline-capable, repository-backed platform for QA officers to manage academic sessions, student and lecturer master data, daily/weekly/monthly lecture compliance, printable attendance sheets, hostel boarding analysis, and a dedicated Remedial Class System — with a mandatory audit trail for material changes.

3. Major features delivered

- Academic sessions with programmes and levels; global active-session context
- Master student and lecturer registries with officer-only CRUD and REF-based audit
- Daily, weekly and monthly QA lecture logging and professional print packs
- Attendance sheet builder with editable Word (.doc) download
- Hostel analysis using master-list hostel placement
- Remedial subsystem: enrolment, timetable, logs, weekly and summary reports
- Lecturer contract hours vs delivered hours
- Role gating and Cloudflare Worker publish
- Full JSON snapshot backup/restore; PIN rotation

4. Current status

Deployed on GitHub Pages and suitable for operational use by the QA Department, subject to officer training, correct session selection, and regular Publish of master data.

5. Known limitations

- Modern browser and periodic Publish required for multi-device consistency
- No student self-service portal
- Biometric machines not live-integrated
- Long-term ownership must sit with the College after the service year

6. Responsibilities after handover

College / QA: data entry, PIN security, Publish discipline, system owner nomination.

Developer (while on placement): orientation, this documentation package, reasonable assistance.

7. Acceptance

By signing, the College acknowledges receipt of the system and documentation, and understanding of officer responsibilities.
