EASTERN OAK COLLEGE OF NURSING SCIENCES

Quality Assurance Department

TECHNICAL DOCUMENTATION

Architecture, stack, data, deployment and configuration

System	EOCNS Attendance & Quality Assurance System
Live site	https://travis-global.github.io/qa_attendance/
Repository	https://github.com/travis-global/qa_attendance
Developer	Fortunatus Alolote Fayeofori
Document date	30 October 2026

1. Architecture

Client-side SPA on GitHub Pages. IndexedDB is the working cache; data/*.json in the repository is canonical. A Cloudflare Worker holds GITHUB_TOKEN and commits allowed JSON paths when an officer publishes.

2. Stack

- HTML/CSS/vanilla JS
- GitHub Pages hosting
- IndexedDB local stores
- GitHub Contents API via Worker
- Officer PIN in data/config.json

3. Repository layout

- index.html, app.js, style.css
- data/*.json master files
- cloudflare-worker/src/index.js
- docs/ documentation package

4. Configuration & security

config.json: qaPin, publishWorkerUrl, publishWorkerKey. Browser never stores the GitHub PAT. Worker checks PUBLISH_KEY and path allow-list. Audit trail expects REF/reason on sensitive actions.

5. Session scoping

Active session filters roster by programmes/levels from the master list. QA entries stamp sessionId/sessionName.
