Quality Assurance Department

PROFESSIONAL PORTFOLIO CASE STUDY

Institutional QA & attendance platform — Fortunatus Alolote Fayeofori

System	EOCNS Attendance & Quality Assurance System
Live site	https://travis-global.github.io/qa_attendance/
Repository	https://github.com/travis-global/qa_attendance
Developer	Fortunatus Alolote Fayeofori
Document date	30 October 2026

Problem

Nursing and midwifery education needs defensible evidence that scheduled teaching held, that attendance and remedial support are tracked, and that official record changes are auditable. Fragmented spreadsheets made QA packs slow and fragile.

Approach

A staff-facing system that works in college browsers, caches locally, and uses GitHub as shared truth — with a Worker so credentials never sit in the frontend.

Implementation

- Session-scoped rosters from one master list
- QA and remedial packs aligned to departmental report practice
- REF/reason culture for sensitive edits
- PIN auth, publish workflow, snapshot backup, full documentation

Technical decisions

Vanilla JS + GitHub Pages for zero server cost; IndexedDB for offline-friendly entry; Worker-isolated GitHub token; print-ready HTML and Word sheets for non-technical staff.

Outcomes

A living institutional system covering QA, attendance, hostel context and remedial administration, with handover docs beyond a single service year — and a verifiable end-to-end case study for the developer.
